## DETAILED ACTION

1. This action is responsive to communications: Application filed on 07/29/03.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

3. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

4. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 2-3 and 8 are rejected under the judicially created doctrine of double patenting over claim 15 of U. S. Patent No. 6,599325 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

6. The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: **Claims 1 and 2:**

**BEST AVAILABLE COPY**

The body of claim 2 contains the phrase “to be imposed on the text-wrapping path” (page 2, lines 10-13); in the present application versus “having a plurality of flow paths” (col. 19, lines 5-40) in the patent (6,599,325).

The body of claim 3 contains the phrase “associating a coordinate system with the text boundary (lines 23-25); in the present application versus “associating a block of text . . . path boundary” (col. 19, lines 5-40) in the patent (6,599,325).

The body of claim 8 contains the phrase “associating a block of data external to the template . . . ” (lines 30-35); in the present application versus “associating a block of text . . . path boundary” (col. 19, lines 5-40) in the patent (6,599,325).

7. Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

#### ***Allowable Subject Matter***

8. Claims 4, and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including an appropriate terminal disclaimer, all of the limitations of the base claim and any intervening claims.

9. Claims 5-7 are allowed.

***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US# 5,559,933.
